

Screenshots and Evidence Checklist

Week 3, Student Motivation & Engagement Survey

SafeX Solutions Internship, Group 43

Yashal Manaiem Javaid | July 2026

Save each screenshot into an "Evidence" folder. Use clear filenames (e.g., 01_form_builder.png). Aim for 12 to 15 total. Full-screen captures on desktop are cleaner than mobile screenshots where possible.

1. Survey Design (Google Forms)

01_form_builder.png

The Google Forms edit view showing the form title, description, and the first few questions in the builder. This proves the form was designed, not just filled in.

02_form_questions_full.png

A scrolling capture (or 2-3 screenshots stitched or numbered) of the full question set. Alternative: take separate screenshots 02a, 02b, 02c covering all 15 questions.

03_form_settings.png

The Settings tab of the form, showing that responses are anonymised ("Collect email addresses" turned off, if it was).

04_form_shareable_link.png

The Send / Share dialog with the form's shareable link visible. Blur any personal Google account details in the top corner if needed.

2. Distribution

05_whatsapp_share.png

A WhatsApp screenshot showing the form link being shared in at least one student group or chat. Blur or crop out any personal contacts before submitting. Only the message and timestamp matter.

06_share_followup.png (*optional*)

A follow-up reminder message sent a day or two later. Optional but useful evidence of active distribution effort.

3. Response Collection

07_responses_summary.png

The Google Forms "Responses" tab showing the total response count (16), and the auto-generated summary chart at the top. This is the single most important evidence item.

08_responses_individual.png

The "Individual" response view, showing that responses are recorded per-respondent. Scroll to any one individual response and screenshot.

09_responses_export.png

The export menu (three-dot menu) with the "Download responses (.csv)" option visible. Proves the data was exported for analysis, not typed in manually.

4. Analysis and Working Files

10_excel_summary_sheet.png

The Summary sheet of the analysis workbook, showing key metrics and top findings.

11_excel_likert_analysis.png

The Likert Analysis sheet, showing the calculated agreement percentages and the associated chart.

12_excel_open_ended_themes.png

The Open-Ended Themes sheet, showing how the qualitative responses were coded.

13_excel_raw_data.png

The Raw Data sheet, showing the full response counts per question.

5. Deliverables Preview

14_report_cover.png

The first page of the Findings and Recommendations Report PDF, showing the title, executive summary heading, and first few lines.

15_presentation_thumbnails.png

A grid or slide-sorter view of the presentation slides, showing all 11 slides at a glance.

Optional but Recommended

16_coordination_message.png

A screenshot of the coordination message with Group Leader Javeria Sharjeel or a Group 43 team-mate, confirming scope alignment. Proves the coordination step was actually done.

17_workspace.png

A photo of the workspace, laptop screen showing the survey being reviewed, notebook with rough notes visible. Adds authenticity to the evidence pack.

Practical Tips

- Take screenshots as you go, not at the end. Recreating a screenshot after the fact rarely looks as natural.
- On Windows: Windows + Shift + S for a snip; on Mac: Cmd + Shift + 4.
- Blur personal contact names and phone numbers in WhatsApp screenshots before submitting.
- Keep filenames sequential (01_, 02_, ...) so the evidence folder reads in order.
- If a specific screenshot is impossible (for example, the form has been closed), note it in the Working Notes rather than faking it.
